The contents of this publication do not necessarily represent the official opinion or policy of the Department of the Army.

The Human Resources Research Office is a nongovernmental agency of the George Washington University, operating under contract with the Department of the Army (DA 44-186-ARO-2). HumRRO's mission, outlined in AR 70-8, is to conduct research in the fields of training, motivation, and leadership.

Research is reported by HumRRO in publications of several types.

1. *Technical Reports* are prepared at the completion of a research Task or major portion thereof. They are designed specifically for a military audience and convey recommendations for Army action.

2. *Research Reports* may be prepared at any time during a Task. They are designed primarily for a research audience but may be of interest to a military audience. They report research findings of interest and value to the scientific community and do not recommend Army action.

3. *Research Memoranda* may be prepared at any time and need not be directly associated with a particular research Task. They report findings that may be of interest to a research or military audience or to both. They do not recommend Army action.

4. *Consulting Reports* are prepared upon completion of consulting action requested under HumRRO's Technical Advisory Services. They are intended for a specific military audience and usually contain guidelines for implementation.

5. *Research Bulletins* are prepared as nontechnical summaries of one or more research Tasks or as reports of other HumRRO activities. They are intended primarily for a military audience and do not present recommendations for Army action. Their distribution usually includes agencies and individuals conducting research, and the general public.

Technical Reports and Research Bulletins may be requested from the Director's Office, which also issues a complete bibliography. Other publications may be obtained from the Director of Research of the originating Unit or Division.

## INTRODUCTION

### Purpose of Technical Advisory Services

The Department of the Army and the Human Resources Research Office have long recognized that HumRRO has a considerable value, and potential for value, to the Army beyond its formal reports of completed research and the pertinent recommendations resulting from research. The most direct and immediately recognized value grows out of assistance given to the agencies that implement recommendations after the related research Task has been completed. The potential value resides in the extensive body of knowledge, experience, and skills in the behavioral sciences possessed by the professional staff that can be applied with benefit to many operational activities where time or the nature of the problem does not permit a research approach. As will later be explained in more detail, this report consists of tabular presentations of Technical Advisory Services (TAS) activities and Action Briefings during the Fiscal Year (FY) 1963.

### Background

Before the beginning of FY 1962, assistance outside the formal program of research Tasks given to operational agencies of the Army was accounted for under the heading of "consulting." It was recognized as an essential and legitimate expenditure of professional time but not to the extent that basic man-years were allotted for it in the formal work program. In a sense, time for consulting was "stolen" from time programmed for research Tasks.

In the preparation and approval of the Work Program for FY 1962, it was decided that a more formal recognition of and provision for technical advisory services were both required and justifiable. An Advisor for Technical Advisory Services was appointed and physically located in Headquarters, U.S. Continental Army Command (USCONARC), and a total of seven basic man-years was programmed for the Training Methods Division (TMD) and the five Human Research Units. It was anticipated that, as in the past, TAS would fall into two principal categories, implementation and consultation, defined as follows:

Implementation: Those formal and informal, coordinated Army-HumRRO activities designed to assist the Army in gaining the full benefit of HumRRO research.

Consultation: Activities less formal than implementation, offered on request, and designed to assist the Army by providing data, information, or advice based on the competence of HumRRO personnel.

### Implementation

Implementation frequently takes place during the conduct of research Tasks and their related subtasks. For example, the product of one subtask, required for the conduct of subsequent subtasks, might be a thorough analysis of a Military Occupational Specialty (MOS). While the analysis is used primarily for this purpose, it may also be used for other purposes by the school or center concerned with training in the Specialty.

During the active lifetime of a research Task, time for implementary services is charged to the Task. Ordinarily, description of such activities would not appear in this report. Exceptions are made, however, where aid has been given to a sister service, as in the case of the Navy (see Table 2) where funds were supplied to obtain the assistance, and where knowledge gained in conducting the research was requested to aid related efforts by other agencies. With the approval and distribution of the final reports the Task is completed, the Task account is closed, and no further charges may be made. This is frequently the time when extensive assistance may be required to implement the over-all recommendations. Once implemented, it may also be helpful to review periodically the current operation of the research-based activity, and to propose modifications where appropriate. In this manner HumRRO assists the Army in maintaining the operational efficiency and effectiveness of the research product.

### Consultation

Personnel who participate in the HumRRO research program must have competence in a wide variety of skills and techniques. This capability is developed by formal education through graduate levels; and increases with experience gained through research in specific Tasks. Some of the skills, techniques, and procedures in the scientist's repertoire are those required in planning the conduct of scientific research; in collecting data (building questionnaires, rating forms, etc.); in analyzing the data and presenting it logically and statistically; in evaluating training methods and devices; and in making evaluations of matériel, from the human factors point of view.

There are many operational questions requiring quick answers, where the application of these skills could assure more effective results. A great many consultations with HumRRO personnel take so short a time—a half hour to an hour—that preparing a formal report may take more time than the consultation. Yet, by a transfer of knowledge, the requester may be set on the right path so that he can proceed directly to his goal. Experience gained in the conduct of research in a specific area may provide answers to questions in related areas. Research by-products may also be applicable in areas other than those for which they were designed. As another example, answers to the questionnaires that are sent out for field evaluation of training-course graduates may prove useful when combined and analyzed. To make these answers valid, the questionnaires may need modification, and here again expert advice is helpful.

Sometimes the consultation may be fairly extensive and significant enough to warrant the publication of a Consulting Report. As an example, the materials prepared to conduct workshops in programmed instruction for the Army were found suitable for reference texts. They were bound and distributed for use by other agencies in the conduct of their own workshops and for use by beginning programmers in preparing programs. Three Consulting Reports are listed in Tables 3, 6, and 7 of this report, even though the Tasks are still active. According to fiscal accounting procedures, these should properly be charged to the parent Task rather than to TAS. They are included, however, because they represent a service to the Army. For the purposes of this report, however, strict fiscal accounting procedures need not prevent the inclusion under TAS of the services represented by these Consulting Reports, which are truly advisory in nature.

#### Technical Advisory Services for Fiscal Year 1963

TAS provided by the Director's Office is, in a sense, a continuing activity. During this year the newly appointed Advisor for TAS at Headquarters, USCONARC, responded to requests for publications, for advice, and for information of all kinds related to HumRRO work. He arranged for briefings on current research, and for implementary actions. In addition, a continuing stream of visitors came to the Director's Office with requests for publications, coordination, and data. Some of this may be considered merely the ordinary conduct of business in a research agency. However, many requests for assistance and for briefings for Allied military and professional personnel, coordinated through the Office of the Chief of Research and Development, are considered TAS in that they tend to support the interests of the Army. The same is true of such requests from the other military departments and the Department of Defense.

Some examples of TAS activities in the Director's Office follow:

Continuing from the previous fiscal year and carrying on into the first quarter of FY 1963, Dr. S.J. Goffard, Advisor on Psychological Research Methods, visited and deliberated with personnel of the U.S. Army Special Warfare Center (USASWC) on the subject of learning radio code. Drawing on past research results, he made recommendations which were adopted to improve the efficiency and effectiveness of the training. This TAS was performed at the request of Headquarters, USCONARC and USASWC.

In October 1962, Dr. W.L. Williams, Jr., HumRRO, Col. D. Cooper, and Lt. Col. E.J. Michaelson consulted with Training Command, U.S. Atlantic Fleet (TRALANT) Navy, concerning functional context training (FCT), a product of past HumRRO research in Tasks REPAIR and LIMIT, for the Army. This resulted in recommendations from TRALANT to the Chief of Naval Personnel for modification of a certain engineering/advisory service contract with a civilian firm. The contract was to incorporate the requirement for the essential FCT procedures to be used by the firm to assist the Fleet Sonar School, Key West, in developing its training program.

Beginning in May and continuing beyond the end of the fiscal year, at the request of the U.S. Army Research Office (ARO), implementation assistance was given by Dr. W.A. McClelland, Deputy Director, General Operations and Personnel, Dr. J.C. Rupe, Advisor for TAS, and Dr. A.J. McKnight, Senior Scientist (TMD), toward carrying out the recommendations of Task UPSTREAM. As this assistance included the proposal to use documents developed under Exploratory Study "System," TMD and the Air Defense Human Research Unit participated with the Director's Office in providing this TAS. As members of an ARO committee, the HumRRO personnel served with those from the U.S. Army Personnel Research Office, Human Engineering Laboratories, and Army Materiel Command planning the "operational test" of the Integrated Man-Machine Research and Development (IMMRAND) concept in new weapon-system development.

Following are tabular presentations of the TAS activities of the HumRRO Divisions and Human Research Units and a tabular presentation of Action Briefings conducted during FY 1963, although by definition these Briefings are not TAS. This report is designed to convey a feeling for the scope, importance, and variety of activities in which HumRRO personnel have participated. Reports of the subject matter of TAS were separate from fiscal accounting, and time expended was not always indicated on the reports that are summarized here. If time was reported, it has been, where possible, combined to represent the total amount expended by all personnel.

Some TAS activities have been individually reported because of factors such as extensive amount of time expended, amount of work done, or significance. Others have been grouped together because they dealt with the same topic, have continued over a period of time, and have been the subject of several reports. Still others have been grouped together because they have often been accomplished in one day or less, even though individually they may have importance for the requester or significance in time saving, prevention of false starts, improvement of effectiveness, and so forth. To report each of the myriad contacts would probably have bogged down the reader in excessive detail and detracted from the interest of this report.

**TABULAR PRESENTATION OF TECHNICAL ADVISORY SERVICES  
AND ACTION BRIEFINGS  
BY HUMRRO DIVISIONS AND UNITS**

**1 July 1962 - 30 June 1963**

**Tables 1 - 8**

**Table I.**  
**Training Methods Division**

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
FORECAST	FORECAST assistance to U.S. Navy	COMTRALANT	Mar-Jun 63 (Continuing into FY 64)	Dr. Shriver Mr. Trexler	42
	Objective: To train Navy instructors to conduct the FORECAST type of training with FORECAST manuals for the LORAN AN/UPN-12 and AN/UPN-15 systems.				
	Outcome: The FORECAST concept (manuals and training) is being implemented at the Fleet Training Center in training personnel for the Atlantic Fleet and generating performance data on graduates; performance will be compared with that of graduates of the conventional course.				
FORECAST	Briefing	USASCS	Sep 62	Dr. Shriver	1
	Objective: To brief USASCS personnel on the FORECAST concept of electronics maintenance manuals and training as developed for the OrdCorps.				
	Outcome: Discussion of how the concept would fit or could be tailored to electronics maintenance in the SigC.				
FORECAST	Assistance in preparing FORECAST analysis.	USAOMC	Nov-Dec 62	Dr. Shriver Mr. Trexler	12
	Objective: To assist the USAOMC in preparing a FORECAST analysis of the Hawk missile test set to be used as a field change to the Technical Manual. The manufacturer's documentation in the Technical Manual was deemed inadequate by the USAOMC.				
	Outcome: A FORECAST analysis of the Hawk missile test set was conducted, documentation was prepared, and the errors and inadequacies of the manufacturer's documentation were specified. The package was presented to the USAOMC for use as a change order to the existing Technical Manual.				
Not Task Related	Identification of course material amenable to PI.	USASWC	Mar 63	Dr. Illohn Dr. Seidel Dr. Fikk	16
	Objective: To examine training content of courses at the USASWC and USASWS; to identify what would be amenable to PI.				
	Outcome: A memorandum, "Suggestions for Application of Programmed Instruction to STC and SWS Training," was submitted to the Center. The purpose of this memorandum was to assess potential gains through the application of PI, to identify course content material most amenable to PI, and to suggest an approach for initial application of PI.				

Table 1 (Continued)

## Training Methods Division

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory personnel	Time Expended (days)
Not Task-related	Guidance on training of low-aptitude personnel.	USASCS	Jun 63	Dr. Lyons Dr. Vineberg Dr. Shriver Dr. MacCaslin Dr. Seidel Mr. Trexler	2
JOBTRAIN	Field Test by School of JOBTRAIN Course.	USASESCS	Jan-Jun 63 (Continuing into FY 64)	Mr. Gebhard	38

**Objective:** To provide information relevant to the training of low-aptitude personnel for Dr. Vincent Cieri, Educational Advisor, USASCS.

**Outcome:** Dr. Cieri was briefed on the current work program of TMD and discussed his problem with various members of the Division. He was given potentially relevant documents from Tasks, METHOD, LIMIT, FORECAST, JOBTRAIN, and SHOCKACTION.

**Objective:** To assist USASCS personnel in the development of an experimental course for training radio repairmen in accordance with JOBTRAIN methods.

**Outcome:** Assistance was rendered in construction of lesson plans and printing of job aids. Training commenced in Mar 63.

Table 2  
Training Methods Division and Language and Area Training Division

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	<p>Language Training in the Orientation and Career Course, U.S. Army Valor Program, Phase I.</p> <p><b>Objective:</b> To evaluate a language training program plan to prepare career officers for urgent and unpredictable overseas assignments. This language program called for the training to be added to the Orientation and the Career Courses at each Service School.</p> <p><b>Outcome:</b> A report was prepared reviewing this program and comparing its likelihood of success with the estimated costs and magnitude of the undertaking. Ways of coping with major problems that would be met in implementing the plan were suggested. Subsequent to the preparation of this review, however, program implementation was deferred, pending further study and the availability of funds.</p>	USCONARC, under direction of ODCSOPS	Sep-Dec 62	Dr. Rocklyn Dr. Fiks Dr. Garvey Dr. McCrary	31
Not Task-Related	<p>Vietnamese Language Training Program at the U.S. Army Special Warfare Center, Fort Bragg.</p> <p><b>Objective:</b> To provide military personnel assigned to Vietnam with some minimal exposure to Vietnamese, when circumstances made it impossible to utilize existing Army language training facilities.</p> <p><b>Outcome:</b> After review of the existing Vietnamese language program, an interim recommendation was made regarding the more effective use of resources at Fort Bragg. The feasibility of a brief, self-instructional course in Vietnamese, recommended by OGRD to be developed for Vietnamese assignees, was investigated. The outcome was the establishment of DIAHQ Task MALT, with the objective of developing, as recommended, a brief, self-instructional course in Vietnamese, aimed at providing language skill for personnel assigned to Vietnam, when schedules do not permit formal language training.</p>	USCONARC (Requirement levied by Maj. Gen. Clark, ARO)	Nov 62	Dr. Rocklyn Dr. Fiks Dr. Garvey	48
Not Task-Related	<p>Comparison of two language aptitude tests, the Modern (MLAT) and the Army (ALAT) Language Aptitude Test.</p> <p><b>Objective:</b> To obtain technical information that could be used as a basis for deciding which of these two aptitude tests should be standardized for use in the foreign language training programs of the DOD.</p> <p><b>Outcome:</b> A report of the relative effectiveness of these tests was prepared. The report provided a technical basis for the decision of the DIAHQ to utilize the ALAT as the standardized test in the DOD language training program. Detailed estimates of the operational and economic savings to be effected by using this test will be provided in the near future by the DIAHQ.</p>	HQ DIA	Mar-Jun 63	Dr. Rocklyn Dr. Lerdy Dr. McCrary	45

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	<p>Consultation and review of programmed texts on nuclear weapons and their effects.</p> <p><b>Objective:</b> To review a programmed text on nuclear weapons and their effects.</p> <p><b>Outcome:</b> After reviewing the programmed text, recommendations were made in regard to changes and additions. The programmed text was revised in accordance with the recommendations, and subsequent notification was received from the USAF Reserve, pertaining to the increased efficiency of text usage.</p>	USAF Reserve, Andrews AFB	Jul-Aug 62	Dr. Rocklyn	3
Not Task-Related	<p>Observations and Recommendations concerning technical training in the Chinese Army.</p> <p><b>Objective:</b> To provide recommendations for improving technical training employed by the Chinese Nationalist Army, Taiwan, as requested. This service was in actuality a by-product of a trip to Taiwan, accomplished in connection with Exploratory Study Map.</p> <p><b>Outcome:</b> A report of on-the-scene observations, with recommendations, was furnished the Assistant Chief of Staff for Personnel of the Chinese Nationalist Army. The Commander-in-Chief subsequently approved the recommendations which were then reflected in official directives issued by the General Staff to all Army Service Schools for guidance and for improvement of training methods.</p>	The Chinese Nationalist Army	Oct-Nov 62	Dr. Brown	1
Not Task-Related	<p>Estimation of foreign-language-speaking proficiency of large numbers of Armed Forces personnel.</p> <p><b>Objective:</b> To facilitate an empirical examination of the feasibility of using the machine-scoreable Army Language Proficiency Test to estimate levels of speaking proficiency.</p> <p><b>Outcome:</b> Data collected from two recent classes of language school graduates in several language departments at the DLI, WCB are currently being analyzed. A report reflecting the findings will be sent to DLI, WCB.</p>	HQ-BLJ; DLI, WCB	Jun 63	Dr. Leedy Dr. McCrary	20

U.S. Army Infantry Human Research Unit

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	Consultations (24 of one day or less) concerning human factor problems, review of training materials, attending conferences, presenting training courses, evaluation of proposed products, etc. Subjects included were techniques of fire, night vision weapons sight, Army marksmanship program, combat reaction course, explosive foxhole digger, live night-fire problems in DCT, and U.S. Army Air Assault Division.	Agencies assisted were mainly USAIS such as Weapons Dept., Editorial Advisor, etc., but also included USAICDA, USMA, USAIB, CORG, and industry.	Jul 62-Jun 63 (Continuing)	All professional staff members participated in one or more.	

Table 6  
U.S. Army Air Defense Human Research Unit

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
TEXTRUCT II	Preparation and publication of GII, "The Text of an Orientation Workshop in Automated Instruction."	USCONARC	Jul 62	Dr. Melching Dr. Cox Dr. Rupe Dr. Smith	
TEXTRUCT II	Conduct of two-week workshops in Programmed Instruction to train programmers at Forts Benning, Lee, and Bliss.	USCONARC	Oct-Nov 62	Dr. Melching Dr. Rupe Dr. Kubala Mr. Christensen	132
TEXTRUCT II	Consultation on evaluating ARADSCH-produced auto-instructional program, developed by students of ADHRRU Workshop.		May 63	Dr. Melching	
UPSTREAM System (TMD)	Participation in Electronic Industries Association M-5.7 Human Factors Subcommittee on Development of a DOD-Wide Human Factors Specification.		Jul 62 (Continuing)	Dr. Rupe; ADHRRU Dr. McKnight, TMD Mr. Butler, TMD	
Not Task-Related	Consultation on preparation of brochure on training quality control, "End-of-Course Qualification Test."	ARADSCH at request of USCONARC	Aug 62	Dr. Rupe	
Not Task-Related	Presentation of paper on Technology of Training at ATRC Conference on training evaluation at Lowry AFB.	ATRC	Sep 62	Dr. Smith	3
VIGIL	Provision of information on optimum length of radar watch, and optimum radar symbology.	USAADCDA	Sep 62	Mr. Wright Mr. Lehr	
RADAR VI MAINTRAIN I	Consultation to improve the teaching of basic electronics.	Asst. Comdt., ARADSCH	Oct 62		
MAINTRAIN	Consultation at Bell Telephone Laboratories on application of MAINTAIN techniques to Zeus (A-VIS).	Zeus Project Office, Bell Telephone Labs.	Oct 62	Dr. Rogers	

(Continued)

Table 6 (Continued)  
U.S. Army Air Defense Human Research Unit

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	Preparation of proposed method for evaluation of A-VIS.	USARADBD	Nov 62	Dr. Baldwin Dr. Rogers	1
PIONEER V	Consultation and work on ARO Committee on STINFO.	ARO	Nov-Dec 62	Dr. Rogers	
SAMOFF III	Briefing on SAMOFF research given at Redstone Arsenal for USAOGMS.	Comdt., USAOGMS	Dec 62	Dr. Haerland	
SAMOFF IV				Dr. Ammerman	6
TEXTSTRUCT	Obtained permission for an Army contractor to reproduce, for internal plant use, "Pocketschool Series, Mathematics I-VII" developed and published by ADHRRU.	The Martin Co., Orlando, Fla.	Feb. 63		
UPSTREAM III	Consultation on correction of inadequacy of Preliminary MAULER Task and Skill Analysis (TASA) produced by contractor. Preparation of sample TASA on Hawk to aid contractor.	ARADSCH	Apr 63	Dr. Baldwin	10
MAINTRAIN V				Dr. Rupe Dr. Cox Mr. Thorne Mrs. Harris	
Not Task-Related	Service on Ad Hoc Committee to examine BCT to align it with needs of basic soldier.	USCONARC	May 63	Dr. Cox, ADHRRU Dr. Taylor, LIRRU Dr. Snyder, LIRRU Dr. Showel, LIRRU Dr. Whitmore, AIRRU Dr. Ward, IIRRU	5 (each man)
UPSTREAM III System	Participation in ARO-chaired committee composed of HumRRO, AFHQ, HEL, AMC, formed to plan and execute the implementation of UPSTREAM III.	HFORD, ARO	May 63	Dr. Rupe Dr. McClelland Dr. McKnight	5
Not Task-Related	Evaluation of a Raytheon Manual on Hawk Functional Theory.	ARADSCH	Oct 62	Mr. Thorne	2
Not Task-Related	Participation in Conference re digital computer training device.	ARADSCH	Nov 62	Dr. Cox	2

Table 6 (Continued)  
U.S. Army Air Defense Human Research Unit

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	Consultation re functional context training. Review of lesson plans.	ARADSCII	May 63	Dr. Rogers	.5
LOCK-ON	Consultation re on-the-job training programs and job aids, and rundown on LOCK-ON.	The Martin Co., Orlando, Fla.	May 63	Dr. Rogers Dr. Baldwin Sgt. Daley	.5
VIGIL V	Meeting with USARADBD re maximum ambient noise levels permissible in radar operator vans.	USARADBD	Oct 62	Mr. Wright	.5
Not Task-Related	Determination of minimum math skills required for basic electronics and missile system instruction.	ARADSCII	Jun 63 (Continuing into FY 64)	Dr. Cox Mr. Montgomery	.15

Table 7  
U.S. Army Aviation Human Research Unit.

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	Consultation with North American Aviation, Columbus, on Simulator Study for New Surveillance Aircraft.	USATRC	Jul 62	Mr. Wright	1.5
LOWENTRY	Seminar on Light Intensification and Night Vision at Mobility Command, Detroit Arsenal. Presentation of paper on "Pilot Information Requirements for Low Level Flying with Restricted Visibility."	Director of Engineering, AMC, St. Louis	Sep 62	Mr. Wright	3
Not Task-Related	Considerations for providing continuous AvnIRU TAS to USAATB by full-time assignment of personnel. USAATB has asked Test and Evaluation Command that funds be provided to AvnIRU for two professional employees to make this service possible. Action pending.	USAATB	Nov 62- Jun 63	Dr. Lyons Dr. Prophet Maj. Heid	
Not Task-Related	Consultation on continuing participation in human factors evaluation of prototype LOHs. Visits to three contractor plants. Coordination on plan of test.	USAATB	Nov 62- Jun 63 (Continuing)	Dr. Prophet Mr. Boyd Mr. Wright Maj. Heid Mr. Jolley	
LIFT	Study of proficiency evaluation procedures of the Department of Rotary Wing Training.	Director, Dept. of Rotary Wing Training.	Dec 62- Jun 63 (Continuing)	Dr. Prophet Dr. Coro Mr. Doney Dr. Lyons	77 (professional). 255 (clerical and enlisted)
Not Task-Related	Assistance to USAPHS on warrant officer pre-flight training.	Comdt., USAPHS	Jan 63	Dr. Prophet Dr. Lyons	

*(Continued)*

Table 7 (Continued)  
U.S. Army Aviation Human Research Unit

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	(1) consultation on helicopter training and tactics.	Federal Systems Division, IBM	Jan 63	Mr. Wright Mr. Schultz Mr. Blohm Mr. Jolley	2.5
	(2) consultation on digital computers for helicopter operation.		Mar 63	Mr. Wright Mr. Pauley	
Not Task-Related	Consultation on target recognition from sensor returns.	IBM	Feb 63	Dr. Thomas Mr. Wright Mr. Jolley Mr. Blohm	1+
Not Task-Related	Evaluation of Aviation Training Device, 2-B-12A. At the request of USNTDC, the AvnHRII took part in further evaluations of this device and suggested certain modifications. Further evaluation of the revised prototype will follow.	USAATD	Feb 63	Dr. Prophet Mr. Boney	
OBSERVE I	Elaboration of information on OBSERVE I.	Canadian Army Operational Research Establishment, Ottawa, Ontario, Canada	Mar 63	Dr. Thomas	1+
Not Task-Related	Review of document, "A Mathematical Model for the Visual Detection of Low Flying Aircraft."	USATRC	Mar 63	Dr. Thomas Mr. Wright Dr. Lyons	2
Not Task-Related	Assistance on L.O.H vs. fixed wing study. Preparation of paper drawing upon past research for information relevant to L.O.H study.	USA AVNCDA	Mar-Apr 63 (Continuing)	Dr. Lyons Dr. Prophet Dr. Thomas Mr. Wright Mr. Waller	5.5
OBSERVE I-II	Preparation and presentation of a lecture on visual search techniques for personnel of 73rd Aviation Co. prior to shipment to USARPAC. The programmed materials for observer training developed in OBSERVE II were used to train some of the personnel of the 73rd Aviation Co.	G-3, Fort Rucker	Apr-May 63	Dr. Thomas Pfc Reese Mr. Jolley	4.5

**Table 7. (Continued)**  
**U.S. Army Aviation Human Research Unit**

Task or Activity	Nature of TAS	Requesting Agency	Date	Advisory Personnel	Time Expended (days)
Not Task-Related	Assistance in preparation of briefing for Asst. Secy. of Army for Logistics and Facilities.	USAAVNS	Apr 63	Dr. Lyons Dr. Prophet Mr. Wright	1.5
Not Task-Related	Assistance in connection with Fixed Wing Warrant Officer Candidate Course—Measurement of leadership and self-initiated drop-out training.	USAAVNS	Apr. 63	Dr. Prophet Mr. Boyd Mr. Boney Mr. Jolley	5.
Not Task-Related	Assistance in evaluation of off-the-shelf rotary wing aircraft trainers programmed from Jun through Oct 63.	Cenrt., USAAVNS	May 63 (Continuing)	Mr. Wright Mr. Boyd	5
Not Task-Related	Review of SDRs—Pilot's Clip Board, Rear View Mirrors for Helicopters.	USAAVNCDA	May 63	Mr. Wright Dr. Prophet Maj. Haid	
Not Task-Related	Attendance at and participation in training device conference at Fort Rucker.	USAAVNS	Jun 63	Maj. Haid Dr. Prophet Dr. Caro	3
Not Task-Related	Brief consultations and/or correspondence providing published reports of research by-products, e.g., slides, training materials, etc.	Various Army installations, British Liaison Officer, and industry	Jul 62-Jun 63 (Six meetings)	Dr. Lyons Dr. Thomas Mr. Wright Mr. Blohm	
All Tasks	Consultations on a great variety of subjects drawing upon specific research results, experience, and expertise of professional staff. Includes requested briefings.	Various Army and other military agencies, representatives of Allied Military at request of Army, industry, and other professional and nonprofessional agencies	Jul 62-Jun 63 (38 meetings)	All professional staff.	
LIFT-IV	Preparation and publication of CH, "A System of Flight Training Quality Control and its Application to Helicopter Training."	USCONARC	Jun 63	Mr. Duffy Dr. Colgan
